

Action plan submitted by Hakan Arisoy for Fatih İlkokulu - 01.01.2023 @ 21:57:58

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › You have differentiated levels of filtering in your school which is an excellent policy. A good policy still needs to be regularly updated - is the system being regularly updated? How often are sites requested to be blocked or unblocked? Periodically evaluate whether it is fit for purpose and involve all stakeholders in this process. In addition, bear in mind that an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.
- › It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetylevel.eu/group/community/protecting-your-devices-against-malware.

Pupil and staff access to technology

- › To have a policy that does not allow staff and pupils to use USB sticks is sensible and cautious but sometimes there are instances when use of USBs/removable media might be acceptable. To ensure that secure systems are maintained to the highest standards, include in your Acceptable Use Policy some information on use of removable storage devices. Check the fact sheet on Use of removable devices at www.esafetylevel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- › Consider whether banning mobile devices is a rule that is fit for purpose and if your school might want to allow digital devices for some class activities. You could develop as part of your Acceptable Use Policy a section on how digital technologies can and cannot be used in the classroom; see the fact sheet on Using Mobile Phones at School (www.esafetylevel.eu/group/community/using-mobile-device-in-schools).

Data protection

- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.
- › Ensure that all staff are aware of the procedure for purchasing new software and that all licenses are appropriate for the number of pupils and staff that will be using them. The [End-user license agreement](#) section in Wikipedia will provide useful information for understanding terms and conditions and comparing software agreements.

IT Management

- › There is a mechanism set up in your school that allows any staff member to make a request for new hardware/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

Policy

Acceptable Use Policy (AUP)

- › It is good that school policies are reviewed annually in your school. Ensure that they are also updated when changes are put into place that could affect them. All staff should be aware of the contents of the policy.
- › In your school policy issues are regularly discussed. This is good practice as it ensures staff and pupils are aware of them. Do pupils and staff also have to sign related documents to confirm their awareness?
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

Reporting and Incident-Handling

- › Please share the materials in which you tackle these issues especially with pupils and parents in the of the eSafety Label portal.

Staff policy

- › There are dangers associated with the use of personal mobile devices in class. Consider why staff would need to use their device and, if appropriate, consider providing a school device. Advise staff to read the fact sheet on

Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools) and ensure that the guidelines to staff are clearly communicated in the School Policy.

- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?
- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.

Pupil practice/behaviour School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetylabel.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.
- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

Practice

Management of eSafety

- › It is good that all staff in your school are responsible for eSafety. However, it is good practice to appoint a person who will have overall responsibility for eSafety issues to provide the focus needed. Ideally this should be someone from the senior leadership team. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetylabel.eu/group/teacher/incident-handling.
- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

eSafety in the curriculum

- › It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.
- › It is good that you are making a specific reference to sexting within your child protection policy as this is a

growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.

- › It is good that sexting has been integrated into wider online safety education across the school. Are you able to assess the impact of this education? Does it help pupils to modify their behaviours? How do you know?

Extra curricular activities

- › How do you organise peer mentoring among pupils on eSafety? Check out the resources of the [ENABLE project](#) and share your ideas in the [forum](#) of the eSafety Label community so that other schools can benefit from your experience to establish a similar approach.
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to info-insafe@eun.org.

Sources of support

- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).
- › It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
